STOP - BEFORE YOU OPEN MO.AI

READ THIS FIRST

mo.ai | Windows setup guide | takes about 2 minutes

1 Extract the whole zip

Right-click the downloaded zip, choose Extract All, then open the new mo.ai folder.
Do not run mo-ai.exe from inside the zip window: it will not work there.

2 Pin mo.ai to your desktop

In the mo.ai folder, double-click "Create Desktop Shortcut" (a Windows Batch File).
Wait until the black window says "Successful", then close it.

3 Open mo.ai

Double-click mo-ai.exe, or the new mo.ai icon on your desktop.
The first time, Windows may show a blue "Windows protected your PC" box.
Click "More info", then "Run anyway".

Seeing the Windows warning is expected.

Windows shows it the first time you open a newly downloaded app, and you only have to click through it once. The next two pages show every click with pictures.

Next: pages 2 and 3 show each step with pictures >

MO AI • APPLICATION SETUP GUIDE

Windows Installation & Launch Instructions

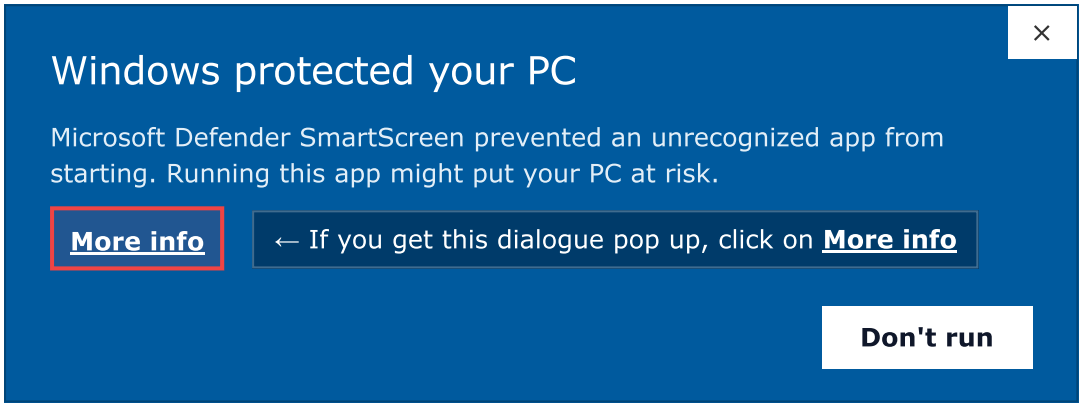
Executable: `mo-ai.exe`
Platform: Windows PC

01 Double-click the Windows batch file to pin the app to your desktop

Locate the `Create Desktop Shortcut` Windows Batch File in your folder and double-click it to pin **mo ai** to your desktop (see Page 2 for full details).

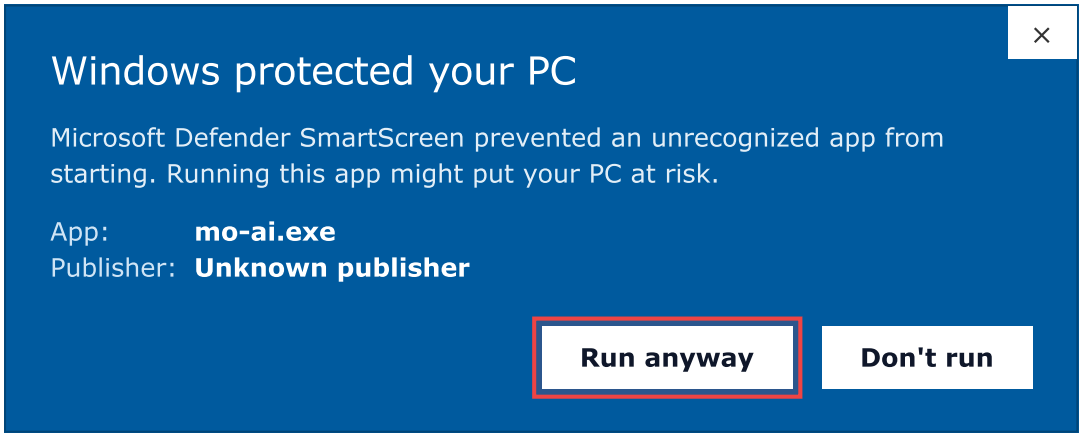
02 Double-click the `.exe` file & expand SmartScreen details

Double-click `mo-ai.exe` to launch the application. If the **Windows protected your PC** dialogue pops up, click on **More info**:



03 Click on “Run anyway” to proceed

Once the application details appear (`App: mo-ai.exe`), click the **Run anyway** button at the bottom of the window to open **mo ai**:

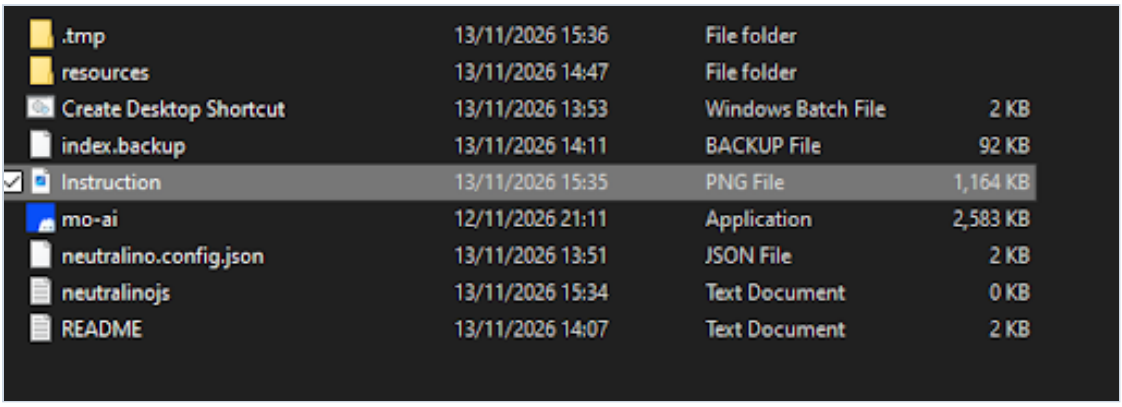


Note: Windows displays the SmartScreen prompt the first time you launch a newly distributed executable. After clicking **Run anyway** once, subsequent launches of `mo-ai.exe` will open directly.

Pinning mo ai to Your Desktop

01 Click on “Create Desktop Shortcut” in the application folder

Open your extracted **mo ai** folder and double-click the `Create Desktop Shortcut` (Windows Batch File) item located above the `mo-ai` application:



Select and double-click **Create Desktop Shortcut** (Windows Batch File) inside the folder.

02 Wait for the terminal window to say “Successful”

A command prompt window titled `mo.ai - Create Desktop Shortcut` will open automatically. Keep this terminal window open and allow it to finish running until it displays **“Successful”** before closing or launching the shortcut:

```
Expected Terminal Output: Allow the script to run until the terminal
says "Successful".
```
